

This diagram shows a top-down view of a vehicle chassis. A central drive shaft, labeled 14, runs horizontally through the middle. At the rear of the chassis, there is a differential assembly, labeled 20, which is connected to the drive shaft. The chassis has a rectangular body, labeled 10, and two side rails, labeled 12, extending from the front to the rear. The rear differential assembly 20 is shown in detail, including its housing and internal components. The drive shaft 14 is shown with a universal joint at the front and a splined end at the rear. The side rails 12 are shown with mounting brackets at the front and rear. The chassis body 10 is shown with a central section and two side sections.
